(3)

Q. ③ what are the various forms of investment alternatives?

Ans :-

Q. ④ Equity shares are a good investment. Discuss.

Ans. Equity Shares are those which are not preference shares.

They are also called ordinary shares. Equity shares provide initial capital on permanent basis to the company. Being the real owners of the company, equity share holders control the affairs and bear the risks of the company. They get dividends only after the dividend payments to the preference share holders. In case of winding-up of the company, equity shareholders are the last recipients of their capital.

- (v) Development of Co-operative Institution
- (vi) Management of public debt (vii) Balanced Development
- (viii) Credit Control (ix) Economic and Technical Advice
- (X) Inspection and control.

### SECTION - B

② (1) From the data given below calculate forward Premium or discount, as the case may be, of the \$ in relation to the spot

Re./\$	Rs. 76.9542 / 77.1255	1 month forward	3 month forward	6 month forward
		Rs. 77.2111 / 4000	Rs. 76.6055 / .7555	Rs. 77.8550 / 9650

Solution :- Premium with respect to Bid Price.

$$1 \text{ month} = \left( \frac{\text{Rs. } 77.2111 - \text{Rs. } 76.9542}{\text{Rs. } 76.9542} \right) \times \frac{12}{1} \times 100 = 4 \text{ Percent per annum}$$

$$6 \text{ month} = \left( \frac{\text{Rs. } 77.8550 - \text{Rs. } 76.9542}{\text{Rs. } 76.9542} \right) \times \frac{12}{6} \times 100 = 2.34 \text{ percent per annum}$$

Premium with respect to ask price.

$$1 \text{ month} = \left( \frac{\text{Rs. } 77.4000 - \text{Rs. } 77.1255}{77.1255} \right) \times \frac{12}{1} \times 100 = 4.27 \text{ percent per annum}$$

$$6 \text{ month} = \left( \frac{\text{Rs. } 77.9650 - \text{Rs. } 77.1255}{77.1255} \right) \times \frac{12}{6} \times 100 = 2.18 \text{ percent per annum}$$

In case of 3 months forward, spot rates are higher than the forward rates, so if the forward rates are at a discount.

Discount with respect to Bid Price.

$$3 \text{ months} = \left( \frac{\text{Rs. } 76.9542 - \text{Rs. } 76.6055}{\text{Rs. } 76.9542} \right) \times \frac{12}{3} \times 100 = 1.81 \text{ percent per annum}$$

Discount with respect to Ask Price.

$$\left( \frac{\text{Rs. } 77.1255 - \text{Rs. } 76.7555}{\text{Rs. } 77.1255} \right) \times \frac{12}{3} \times 100 = 1.92 \text{ percent per annum}$$
